

"Our Colorado vNet system was the best decision we made. We use it everyday and I can't imagine living without it."

Rest assured. Never come home to a dark house again—turn on lights from your car or have them come on automatically at sunset. With a single touch, mimic daily routines of lights, shades, music and more to give your home an occupied look when you're away.

Save yourself steps. Adjust the heat in any part of the house. Arm the security system of your home office from the kitchen. Turn off the main lights, dim the landscape and set nightlights—all from the comfort of your bed with one push of the "goodnight" button.

Vibe Color Touchscreen Applications

"We looked at many systems and found no comparison to the style and value of Colorado vNet."

Let the music play. Drop your iPod® in the dock when you arrive home so anyone can enjoy your commute tunes. Or access your entire CD collection from any room. Everyone in the household can enjoy their own audio selection from today's popular sources in multiple rooms simultaneously.

Capture the mood for any activity. Ease into your day with the "morning" button that gently raises the lights and shades. "Dining" sets a warm glow over the table perfect for a relaxing meal. "Cleanup" brings everything to full brightness so you don't miss a speck. Don't forget the "movie" button to dim the lights, lower shades and start the DVD player.

Entertain with style. Start your party music playlist. Illuminate outdoor lighting, accent art pieces, turn on the fireplace, and set lights throughout the house to the desired levels with one touch of the "entertain" button.

Unique design, simple versatility. Control indoor and outdoor lights, shades, home theater screens, fireplaces, fans and more with the revolutionary Colorado vNet Lighting & Control Systems. Consolidate switches and customize labels with graphics, colors and fonts to match your style and home décor and eliminate guessing which switch controls what.

VIBE™ Color Touchscreen

"Our CDs used to just sit in stacks in the family room. With Vibe, we listen to our music so much more – and from every part of the house!"

Sleek, Powerful Control

Consolidate switches, thermostats, dials, etc. into stylish Touchscreen displays to control your audio, security system, temperature, lights, shades, fountains, theater screens and more—throughout your entire house.

The Vibe™ Audio System

Vibe delivers remarkable style, unparalleled control and crystal clear sound to every room. The elegant interface with digital amplifier combines sound quality with instant, intuitive control of each audio source, anywhere on your system.

Climate, Security and CCTV Applications

Manage your climate and/or security systems and view security cameras from any Touchscreen. Integrated home control saves you steps and eliminates wall clutter.
